

Want to ease your dog's discomfort and restore their youthful behavior so they can be an active, tail-wagging family member again?

World-Renowned Veterinarian Reveals Scientific Breakthrough That Transforms Old and Injured Dogs Into “Puppies”—Without Medications or Glucosamine

“I’ve been practicing veterinary medicine for over 30 years and I’ve never seen anything as safe and effective as this new, scientifically developed formula. Prescription medications can be a problem because of their side effects. And most other natural products like glucosamine don’t work fast or completely enough. But every single dog I’ve put on DGP has shown results, usually in 7 days or less...with no side effects.”

Dr. Kim McKellar, internationally acclaimed veterinarian and a specialist in treating mobility issues in dogs slowed down by age or injury.

Dr. McKellar sees results in 7 days or less with DGP.

Dear Reader,

“You can safely restore the puppy-like behavior of your old or injured dog in just one or two weeks.” When nine out of ten dog owners read that statement, their minds glaze over and they say “Yeah, right. I don’t believe it.” That’s understandable.

Many dog people have tried other products like prescription medications because they were told it would help their dogs. What those people didn’t know was the dangerous side effects these medications were silently causing inside their dog...until it was too late and the damage had been done. Or they give their dog glucosamine but aren’t sure if the stuff even works (not too well as I’ll show you in a minute).

So now their dogs never will get better because they’ve been burned by wild advertising claims before and they refuse to consider any new possibilities. They’ve lost all hope that anything will help their dog.

Is this you?

➔ **But I’m looking for that one dog owner in ten who’s as crazy about dogs as I am and open minded enough to say: “Okay, I’ll give you two minutes for my dog’s sake...prove it.”**

If you’re that one dog owner, what I’m going to reveal to you *continues...*

WARNING: Which of these 12 symptoms on page 2 does your dog have?

Test the Joint Health of Your Dog Take the Dog Symptom Quiz

Does your dog	Yes	No
1. Limp or appear stiff?		
2. Weigh more than 35 lbs.?		
3. Have trouble getting up from the ground?		
4. Have trouble climbing stairs or jumping into the car?		
5. Spend the day quietly hidden away & withdrawn?		
6. Show a change in behavior (perhaps grouchier)?		
7. Tire easily?		
8. Have a history of injury?		
9. Have bones that snap, crack, or pop when walking?		
10. Appear restless or have trouble sleeping?		
11. Whine or cry out if touched or massaged?		
12. Move slower than normal?		

ATTENTION: If you answered **YES** to any one of these questions, your dog may be suffering and showing signs of joint discomfort (or may be more likely to have future joint problems).

today could change your dog's life...maybe even save its life. Not by some kind of magic. But because of the dedication of some of the world's most renowned veterinarians and herbalists who are just as nuts about dogs as you and I are.

And because I'm so sure this breakthrough will work on your dog, I'm willing to let you try it without risking a single red cent—so you can prove to yourself what I say is true.

Here's what this is all about.

This stunning discovery happened because of some thoroughbred horses in Australia. Why horses? Because in Australia, horse racing is big business. Those expensive purebred horses often end up with injuries that slow them down and make them lame. Many of the top veterinarians in Australia were trying to figure out safe, natural ways to resolve those problems so these magnificent animals could run at full gallop again.

So, some researchers and master herbalists went into the lab and began experimenting by blending several specific, handpicked herbs together. These herbs had been used and relied upon for centuries by Aborigines (the original inhabitants of the Outback in Australia) because of their potent and soothing relief of joint and leg discomfort.

Two days is all it took...and the doctor could already see a positive change in his dog

When the veterinarians gave the formula to the horses, these animals began making miraculous recoveries. This news led famed veterinarian Dr. Kim McKellar to ask a simple question: "If this works so well on horses, I wonder if it would work for my worn out 13-year-old black Lab Tom?"

The herbalists and researchers tweaked the formula so it would be suitable for testing on Dr. McKellar's dog. Did it work? Did it ever! After they saw how well it worked, they named the herbal blend DGP for Dog-Gone Pain. Here are the actual field notes from Dr. McKellar's journal before DGP and after DGP:

Before DGP: Tom has trouble getting onto his feet due to ^{severe} back pain and is reclusive in nature and spends his time under a tree watching the traffic go past and basically contributes nothing to the family. He has lost all interest in his surroundings and I dearly miss his company. There is pain on extension of the elbow joints, and he will become aggressive when the joints are manipulated.

After DGP: On DGP Tom rejoined the family and physically greets all arrivals to the property, bounces and wags his welcome. Capable of walking and keen and willing to join a walk, in fact he has become a young dog again. He has been on DGP for ~~15~~ 18 months without side effects. He relapses after 48 hours of no DGP and literally becomes a wreck.

Dr. McKellar has now given DGP to hundreds of dogs for over three years with almost a 100% success rate...and no side effects.

This is awesome news for you and your dog

Imagine what a wonderful turn of events this could be for you and your dog. Picture yourself strolling around the neighborhood or park again with your dog. How many times have you wished you could experience the sheer joy of seeing your furry friend chase a ball, stick, or Frisbee again? And if you have several dogs, now they can pal around together again.

Yes, DGP really works like gangbusters on slow, lame, or limping dogs. It goes light years beyond anything else that has ever been on the market for dogs. In fact, here are...

14 unique reasons why DGP is the ultimate formula for dogs in discomfort

Those top herbalists and researchers who developed DGP have discovered that it provides all of the following life changing benefits to dogs...

1. There's visible progress in as little as 7 days.
2. Helps to relieve aching joints so your dog feels comfortable.
3. Nourishes the joints and muscles to increase joint mobility.
4. No adverse side effects.
5. Aids digestion and gastrointestinal function.
6. Soothes inflammation.
7. It's easy to feed (most dogs eat DGP right out of their owner's hand).
8. Revitalizes your dog and restores youthful behavior.
9. Ingredients have been safely used for thousands of years.
10. Supports degenerated joints and connective tissue.
11. It's been formulated and rigorously tested by leading researchers and veterinarians.

continues...

12. Replaces less effective and potentially harmful products.
13. Helps ease your pet's stress and improves their attitude (less worry for you!).
14. Boosts immune system function to give your dog's body ultimate protection.

As you can see, DGP is far more than just a formula for a dog's aching joints. And that's why so many dog owners around the world are reporting their dogs seem happier and more youthful.

Sound too good to be true?

I thought so too when I first heard about this. But like you, I'm passionate about dogs, so it tweaked my curiosity and I was forced to check this out. After all, I'm in the business of discovering natural supplements for people and animals that are safe and go beyond what modern medicine fails to offer.

And I have to tell you, you simply cannot imagine the tears of joy DGP has brought to the dog owners I've shared this with. Hundreds of heartwarming letters have poured into my office. Take a look at some excerpts for yourself:

"After three days of DGP, our barn dog stopped crawling on his elbows to get around and doesn't whimper and cry with his rear end stuck up in the sky."

Emily M., Gadsden, AL

"I was thinking of putting "Wolf" down but after the first days of using DGP, he ran 200 feet and is now walking two blocks three times a day."

George F., Dewey, AZ

"Ten-year-old Jessica hurt her hind leg three years ago and we had to carry her and hold her up with a belt so she could go potty. After one week on DGP you could see a difference and now she runs up and down the stairs like an idiot. She is like a puppy."

Glenn C., Wausau, WI

"My twelve-year-old Bearded Collie mix, Rufus, was distant from family activities. After only one week of taking DGP, he was going out for walks, alert and social again!!!"

Esther W., Encintas, CA

"After my 10 yr. old Newfoundland slipped and re-injured her arthritic hip, I gave her DGP and began to see a difference within 2 days. Your product is god sent."

Kat M., Hawthorne, NY

These results are typical and...

The reason Dr. McKellar recommends DGP for your dog rather than the “not so pleasant” alternatives

If your dog is less active and doesn't get around too well any more, that's pretty common. Millions of dogs around the world are slowing down because of injury, heredity, and aging. And keep in mind dogs just a few months old can develop leg, hip, and joint trouble too. Most vets will give these dogs a prescription medication because many still don't know DGP is available.

as reported in USA Today

But as the following story in the April 11, 2005 edition of USA Today showed, giving prescription medications to dogs can lead to a lot of heartache. This poor lady had given her sweet and beloved Labrador retriever a common and powerful medication (her vet prescribed it) because her dog was moving slower. It didn't take long before her dog started vomiting and had blood in his stool. Within 30 days he had to be put down. The lady said, "I had no earthly idea I was killing my dog."

What a tragic shame. The long-term consequences and risks of some of these medications can lead to liver and kidney damage, vomiting, depression, and diarrhea. But with DGP, that's simply not going to happen to your dog. And here's something else you should know...

CAUTION: Are you giving your dog glucosamine... but aren't sure if it even works?

A study on 137 human patients reported in the October 2004 issue of Arthritis and Rheumatism said this about glucosamine: "...it has no benefit for maintenance and continued use is not effective to control flare-ups." That's pretty blunt and to the point, don't you think?

And researchers at Tufts-New England Medical Center recently conducted a study of 18 people taking the commonly recommended amount of glucosamine.¹ They found that only a tiny amount was even absorbed by the body—insufficient to provide benefits. So, huge quantities of glucosamine need to be taken if there is any hope at all of providing relief to the joints. But those necessary large doses may create serious side effects. One of the researchers said the current suggested amounts of glucosamine are safe...if people don't mind that they may be wasting their money.

"I use DGP in my clinic and on my 11-year-old golden retriever who has struggled with hip dysplasia. After just two weeks on DGP, she was able to jump in the back of my utility vehicle, something she hadn't done in over a year."

Dr. Van, DVM
Des Moines, IA

And consider this. If you give your dog glucosamine, it can take up to 90 days for the effects to take hold and begin to give your dog relief...if it even works at all.

Ninety days for a dog is like two years to a human being!

How would you like to wait two years for your medication to kick in if you had a bad back?

Listen. I don't mean to bad

mouth glucosamine. Maybe you're giving it to your dog. I used to give it to my dog too. Problem is, I was never convinced it was working and I felt like I was just throwing my money away. And now these new scientific studies are backing up what I worried about all along.

Wouldn't you want to make sure any tablets you're giving your dog actually work...especially without being harsh on your dog's system like the prescription medications can be? If you said yes, then you're going to be absolutely thrilled with what DGP will do for your dog.

But I know you might still be skeptical

That's okay. I like skeptical people. I'm the same way. So I've enclosed a slip of paper in the envelope that says, **I Don't Believe It**. When you take a look in there I think you'll be blown away. You'll see letters from people who work with dogs everyday. It's their business to know what works—and what doesn't.

*"I don't know where to start thanking you for the DGP. How about 2 big, wet dog kisses? Wow! What a product! **Everything that you stated about DGP is coming true.** My 8-year-old mutt and 7-year-old German Shepherd are like puppies again."*

Jan C., Ohio

You'll also see what's in DGP: The most powerful, most effective, and most soothing plant sources for relief of aching joints that can be found on planet Earth. And I'm offering you an opportunity to try it on your dog without any risk whatsoever.

No-Risk 100% Money Back Guarantee

I don't expect nor do I want you to take my word for anything I've said today about DGP. Rather, I'm inviting you to put it to the test on your own dog. Here's how. Pick up the phone right now, call the **Toll-Free number at 1-800-714-8939**, and order a supply of DGP for your dog. Or send in the enclosed order form if you prefer.

When the DGP arrives, what you are going to do is this: Follow the dose directions on the bottle. Give the DGP a few days to begin flooding your dog's body with relief. Within days, right before your eyes, you should begin to notice a pleasant change in how your dog acts.

But it could take a week or two before you see a dramatic difference. So keep feeding the DGP for an entire 21 days. If you are one of the very few people who doesn't see an astounding change—the puppy like behavior most other people report—then I insist on giving you a complete and full refund.

And you know what? I feel so strongly about DGP, let me say this: I'll give you your money back for any reason or no reason at all if you don't want to keep the DGP. Just send back up to one opened bottle—even if it's completely empty—and any unopened bottles and I'll

personally guarantee you get a complete refund of your DGP purchase price. Fair enough?

But this is only the beginning. To celebrate your decision today to give your dog a new lease on life...

I've decided to do something extra special for you...

Right now, to give your dog an opportunity to experience the revitalizing effects of DGP, I'm offering you a savings of 15% (\$6) off the normal retail price of one bottle. And in addition, just for trying DGP, if you order in the next 11 days, I'll also let you choose one of the following FREE gifts (see the enclosed flyer describing these bonuses in detail):

- ✓ A compact, 100,000-step pedometer. With this pedometer, you can keep track of how far you go when your "new puppy" starts taking you for walks again. It's good for you...and good for your dog.
- ✓ Or an adjustable beam halogen flashlight that'll be great to have if you're out walking with your dog when it's dark outside.

Want to save even more?

Call Toll Free 1-800-714-8939 and tell my assistant you want to take advantage of the DGP Convenience Plan. You'll get an additional 15% off for a total savings of 30% (\$12 savings per bottle). Plus by calling today you lock in this savings and get FREE shipping and handling...for life!

Look...

30 days from now your dog can be nothing more than a month older. Or, with DGP, your dog can once again be a happy, romping, active member of the family again. You decide.

Also, if you call in and order and take advantage of the DGP Convenience Plan within the next 11 days, I'll give you both of the above gifts for FREE! That's right. I'll give you both gifts and they're yours to keep. Here's what you're going to get if you call right now and take advantage of the DGP Convenience Plan when you order by credit card:

- ✓ A supply of DGP, the world's most effective, most powerful, and most soothing all-natural revitalizing formula for dogs that have slowed down, are lame, or are in discomfort.
- ✓ \$12 savings off on every bottle of DGP.
- ✓ The FREE 100,000-step pedometer.
- ✓ The FREE adjustable beam halogen flashlight.
- ✓ A No-Risk, 100% money back guarantee. If for any reason or no reason at all you are not thrilled with your purchase of DGP, you have a full 60 days to return it.
- ✓ FREE shipping and handling for life.
- ✓ A happier dog!

Don't make your dog wait another day for relief— Make it happen today!

DGP soothes aches and stiffness in a dog's joints so they have a much better quality of life and can participate fully in family

continues...

activities again. It's easily absorbed and digested, there are no known side effects, and there can be dramatic improvements in just one week.

I've been in the business of providing wholesome, natural healing products for more years than I can remember. And I've never seen anything like DGP...and I've never made an offer for any product like the one I just made you. That's because DGP really works and you risk nothing to try it on your dog.

So please don't put this off. Because your dog is as vulnerable as a baby and is counting on you to make the right decisions for its health. And just think. If DGP can work on a broken down, reclusive old black lab like Dr. McKellar's dog Tom, imagine the comfort it could give your dog.

Thank you for taking the time to educate yourself about DGP—the amazing scientific breakthrough that is making the world a better place for dogs...and the people who love to live with them.

Sincerely,

Keith Collins
President, Harmony Co.

P.S. Remember...to claim BOTH FREE GIFTS and save 30% (\$12) off every bottle of DGP, call in and order by credit card within 11 days. Tell my assistant you want the premium rate of the DGP Convenience Plan and FREE shipping for life! So Call **1-800-714-8939** right now while this letter is still in your hand. And get ready to hear that clickety-clack of doggie toenails on the floor when your dog runs to greet you when you get home.

P.P.S. The enclosed dog photo album is yours to keep with no strings attached. The bond between a dog and human is so strong, I wanted to make sure you had a place to display those wonderful memories you've shared with your special friend.
